Professional Summary

- Final-year Computer Science undergraduate with strong problem-solving skills and hands-on experience building scalable backend systems and full-stack applications. Proficient in C++ and JavaScript, with solid foundations in data structures, operating systems, DBMS, and computer networks. Actively seeking SDE New Grad / Entry-Level roles to build reliable, high-performance software at scale.

Education

- **Chandigarh University** Mohali, Punjab
Bachelor of Engineering in Computer Science Aug 2022 – Aug 2026
 - Relevant Coursework: Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks, OOPS, Web Development.
 - Solved **750+ data structures and algorithms problems** across platforms, covering arrays, trees, graphs, hashing, binary search, and dynamic programming.

Technical Skills

- **Programming Languages:** C++, JavaScript, Python
Frontend: HTML, CSS, Tailwind CSS, React
Backend: Node.js, Express.js, MySQL, Firebase
Mobile Development: Flutter
Core CS: Data Structures and Algorithms, Object-Oriented Programming (OOP), Operating Systems, DBMS, Computer Networks
Developer Tools: Git, GitHub, Linux, VS Code, IntelliJ IDEA, Android Studio

Projects

- **Meal Mate - Meals App** | GitHub | *Flutter, Dart* Feb 2025
 - Built a cross-platform mobile app to browse meals by category, view meal details, and apply dietary filters (e.g., gluten-free/vegan-style filtering).
 - Implemented multi-screen navigation with tabs and drawer-based navigation for a clean, user-friendly flow.
 - Developed filter logic and state-driven UI updates to dynamically show meals based on user preferences
- **FareFinder – Smart Fare Comparison App** | GitHub | *Flutter, Node.js, REST APIs* Jul 2025
 - Developed a scalable backend using Node.js and Express.js to aggregate and serve real-time cab and bike fare data via RESTful APIs.
 - Integrated third-party APIs and optimized request handling to ensure low-latency responses for mobile clients.
- **Cosmic - Solar System Explorer App** | GitHub | *Flutter, Firebase* Jan 2026
 - Developed a cross-platform mobile application using Flutter to explore the solar system with an immersive, educational user experience
 - Engineered a full-stack mobile application with 8+ core features including authentication, favorites, profiles, and daily planet highlights

Experience

- **Metacrafters** Remote
Summer Trainee Apr 2024 – Jul 2024
 - Optimized Solidity smart contracts for correctness, security, and gas efficiency, achieving an estimated **15%** reduction in gas costs.
 - Used Web3 debugging tools to ensure transactional accuracy and cost-effective deployment.
 - Awarded a **\$175 merit-based scholarship** for demonstrating strong technical performance and contributions during the Metacrafters program.
